Not bad and not good, mostly a pain with the lack of saving and required guessing to waddle through the events. Choices do matter tho, and choices made in the first one have an impact on your ending in this one, i got a bad ending. I can only wait until a third game is released and hope that atleast some of the people i care about is still around.

I would say a 5 out of 10 tin stars.. Played the demo a bunch with friends and can't wait to play when I have friends over again. One of the best local multiplayer games I've played, right up there with Battleblock Theater and the Overcooked series!. Sadly the dont update this game..... this is gr8 m8 i r8 8 out ov 8. Mars DLC is really good addition to Redout and will give you a good amount of conctect with good music and tracks.. Although this game is really cute, it is way too challenging with the controls. Not many games use the arrow keys to move anymore, it does use the space bar to jump which is nice. But then it uses "D" to make one of your blobs a box and the down arrow to bring them back to you after you moved on. I would enjoy this game a lot more if you at least made it possible to change our controls instead of making us use the confusing controls that are given. very good game. Could have been a really good game. Tough to beat. Dice rolls favor the AI almost every time, Has potential with a followup version.. \u3147\u3145\u3147 Nice Paintjob!

The game is a classic, and if you like point and clicks, check it out.

For a more comprehensive overview of the game, check out my full review here:

The game is really fun, I refuse to recommend it though as the developer was apparently too lazy to have clear explanations of the elements. Also, they're liars cause there's tons of grinding. Way to ruin a great game through laziness! Maybe using an introspection would've helped them.... Awesome addition to an already great variety of bikes and classes AND tracks!. Just downloaded it and the first issue i encounter: WONT BYPASS LOADING SCREEN.. time wasted. this is awesome but only if online worked. This is an abandoned early access cartoony third person arena brawler. Control cell shaded low poly colourful medieval warriors and fight other players... if there were any.

Because the game is multiplayer and is abandoned by the developers before being finished (thanks Valve, your Early Access concept is a resounding success... not), it's unplayable except for badly mad botmatching. Even if the game wasn't abandoned, it's putting low effort low poly graphics up against games with actual gameplay like Mount & Blade, and arena fighters with actual graphics like Chivalry. There was obviously no avenue for success here, which makes it likely that the game is just a shovelware cash grab. Obviously don't buy this.. There's really not enough turn based strategy games out there that I enjoy. This one has a heavy focus on combat and isn't that the point to these type of games. Lots of variety in group formation and different abilities to use. Get ready for some seriously large battles.. Great Game!. This is an exceptionally charming game that harkens back to Mega Drive/Genesis platformers. Notable for doing an excellent job with solid mechanics, good humour and generally making me smile like a goof the entire way through.

The grapple mechanic being your main way of travel and attack is used in a lot of clever ways over the course of the campaign, and it's always throwing something different at you. With quite a few post game goals to aim for through boss rush, time attack and secrets to find.

Also this game has a few accessibility options in place of normal difficulty selection. Letting a player slow the game down or give themselves regenerating or even infinite health if they're having difficulty with it. While I don't get use out of those features myself, seeing them there is something I appreciate quite a lot!

Game was fun! If you're into platformers take a look, this is a good one!
